Getting Started

Follow the directions below to get started, but first watch this introductory [video](#).

1. Review the Instructor Dashboard

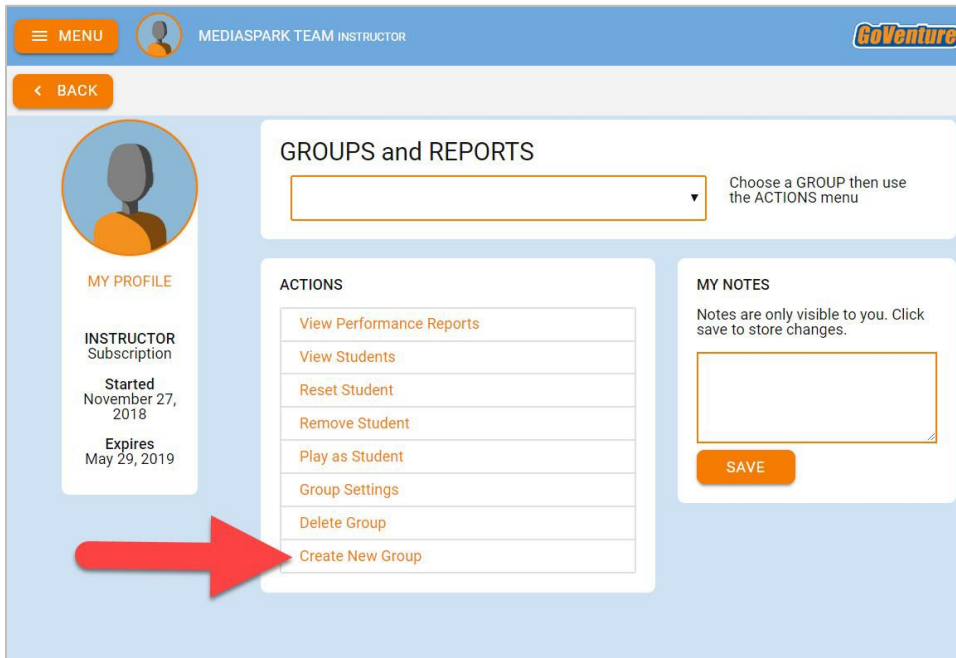

2. Review the Instructor & Student Resources

On the Instructor Dashboard, click  to view the Learning Guide, eWorkbook, Videos, Instructor Guide, and more.

3. Create a Group

On the Instructor Dashboard, click GROUPS AND REPORTS then click Create New Group.

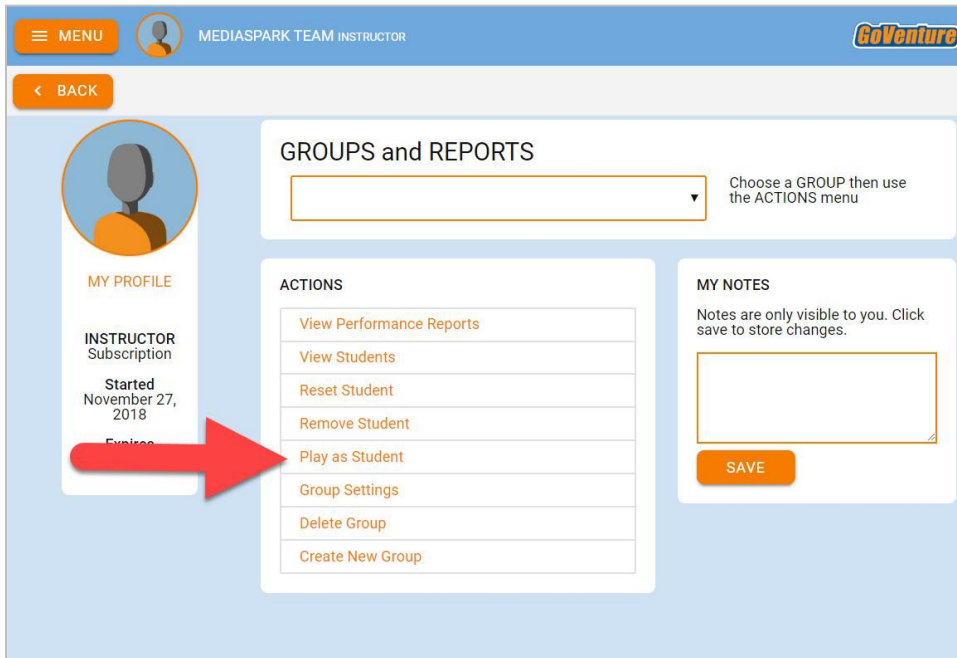

The screenshot shows the GoVenture Instructor Dashboard for 'MEDIASPARK TEAM INSTRUCTOR'. The 'GROUPS and REPORTS' section is active, featuring a dropdown menu for selecting a group. Below this, the 'ACTIONS' menu lists several options: View Performance Reports, View Students, Reset Student, Remove Student, Play as Student, Group Settings, Delete Group, and Create New Group. A red arrow points to the 'Create New Group' option. To the right, the 'MY NOTES' section includes a text area and a 'SAVE' button. The left sidebar shows the instructor's profile and subscription details.

Groups allow you to keep student performance results separated by class, school, region, or any other grouping that you prefer. You can create different Groups with unique settings. Students need a Group number to play the simulation. Without a Group number, students can create login accounts and access tutorials and guides, but they cannot play.

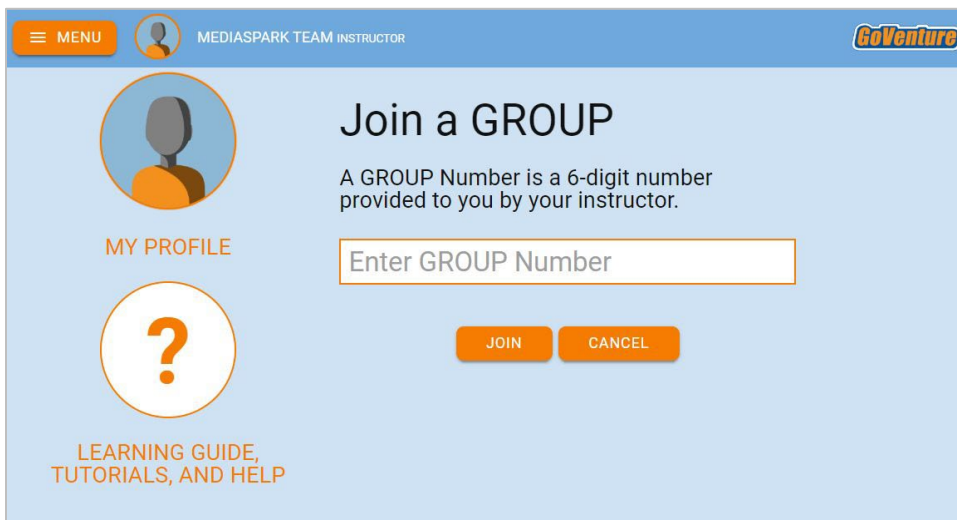

Follow the on-screen directions to choose your Group Settings, then copy the GROUP NUMBER. You will share the Group number with your students so that they can connect with you. **Instructors can also use the Group number to play as a student.**

4. Play as a Student

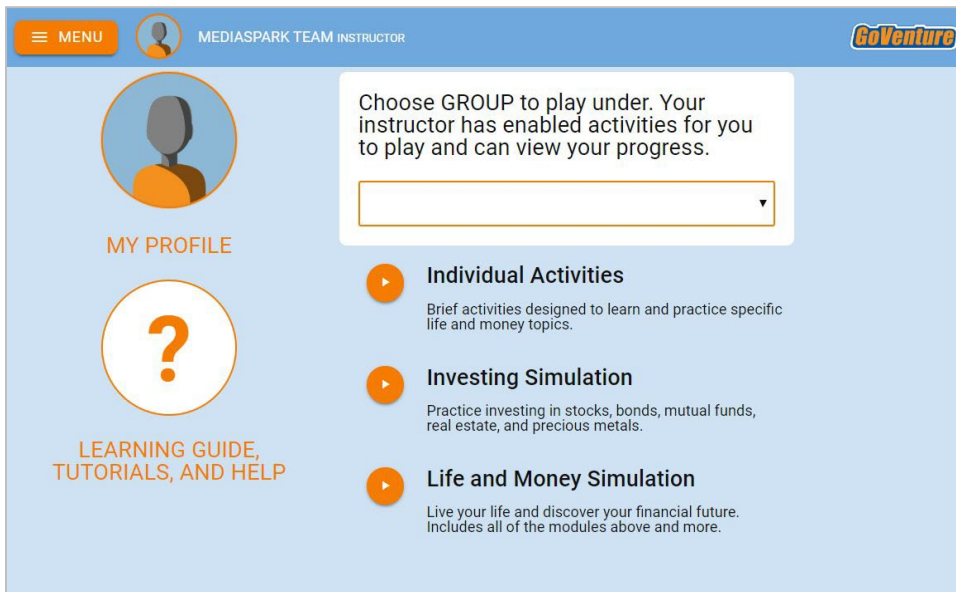

To play as a student, on the Instructor Dashboard, click Play as Student.

Then join the GROUP Number you created.

Click the buttons to access the different components of the simulation.
